SDI Standards and Alerts Available As Free One-Click Digital File

June 8, 2011

WESTLAKE, Ohio — The Steel Door Institute (SDI) Fact File, a popular industry resource that contains all 33 of SDI's standards documents and other technical documents, is now available for free download directly from the Steel Door Institute website www.steeldoor.org.

The Fact File has been available to architects and specifiers as a bound volume. The content is organized into SDI Technical Documents, ANSI/SDI Standards and Test Methods, and SDI Alerts. Previously the electronic files were only available as 33 separate files.

Jeff Wherry, Managing Director of SDI, said "The SDI Fact File binder has been a mainstay on the shelves of architects and engineers for a long time. We have also posted all of our documents in digital format on the SDI website with free downloads. This new digital Fact File saves time by providing all the latest SDI technical documents in one PDF file."

The new digital Fact File is available on the Download Fact File page of the SDI website, <http://www.steeldoor.org/factfile.htm>. The bound copy is still available free and can be ordered on that web page or by faxing a request to (440) 892-1404.

About the Steel Door Institute

The Steel Door Institute (SDI) was established in 1954 as a voluntary, unincorporated, non-profit business association with a mission of promoting the use of steel doors and frames in the construction industry. Representatives of SDI member companies create and publish manufacturing, quality and performance standards promulgated by the association, and distribute them to licensed architects and construction specifiers at no charge.

Membership is open to all U.S.-based companies engaged in the production for sale of swing steel doors and/or frames on a national basis for at least two years. Members agree to abide by SDI manufacturing and quality standards that apply to all doors and frames they produce.
