New Glossary on Steel Door Institute Website

September 19, 2011 WESTLAKE, Ohio – A comprehensive glossary with steel doors and frames terminology has been added to the Steel Door Institute website www.steeldoor.org.

Nomenclature for Standard Steel Doors and Steel Frames ([ANSI/SDI A250.7-1997 \[R2002\]](#)) has been referenced by professionals for decades. This standard has been converted to a glossary to provide a user-friendly interface for browsing or searching definitions. Technical drawings are included with many of the definitions to provide further clarification.

Jeff Wherry, Managing Director of SDI, said, “The popularity of the Nomenclature for Standard Steel Doors and Steel Frames document has increased over the years. We’ve responded by creating a glossary that is easy to navigate, while keeping the technical language from ANSI/SDI A250.7-1997 (R2002) in its entirety.”

The glossary is on the SDI website at <http://www.steeldoor.org/glossary.htm>.

About the Steel Door Institute

The Steel Door Institute (SDI) was established in 1954 as a voluntary, unincorporated, non-profit business association whose mission is to promote the use of steel doors and frames in the construction industry. Representatives of SDI member companies create and publish manufacturing, quality and performance standards promulgated by the association, and distribute them to licensed architects and construction specifiers at no charge.

Membership is open to all American based companies engaged in the production for sale of swing steel doors and/or frames on a national basis for at least two years. Members mutually agree to establish and abide by SDI manufacturing and quality standards that apply to all doors and frames they produce.
