## **Steel Door Institute Sponsors AIA Course at DHI Conference**

*October 3, 2011 WESTLAKE, Ohio* –The Steel Door Institute’s first AIA-registered educational course will be presented at the Door and Hardware Institute’s 36th Annual Conference and Exposition in New York City, October 26 and 27.

Steel: Green Now, Green Forever will be presented as part of a free Lunch and Learn session on Thursday, October 27 at the Javits Convention Center. Industry veterans Jason Lisewski and Tom Barnard of Republic Doors and Frames will be the course presenters. Attendees will receive one AIA/CES LU HSW/SD hour.

The class focuses on the production and recyclability of steel in the construction industry, including LEED credits earned by using steel, steel compliance with green building code requirements, and upcoming revisions to the International Green Construction Code (IGCC).

Steve Hildebrand, Director of Business Development for DHI, said, “We are excited about presenting this course that will provide architects one Health Safety Welfare/Sustainable Design Learning Unit at no charge.

Green building is not only a hot environmental topic, it’s fast becoming the building industry standard.”

### **About the Steel Door Institute**

The Steel Door Institute (SDI) was established in 1954 as a voluntary, non-profit business association that develops quality and performance standards for steel doors and frames.

Representatives of SDI member companies create and publish these standards, which are made available without charge to architects and other design professionals to ensure quality and consistency of hollow metal doors and frames used in construction. [www.steeldoor.org](http://www.steeldoor.org)
