Hollow Metal Xpress Joins SDI

December 19, 2013 PHOENIX, Arizona – Hollow Metal Xpress (HMX) is the newest manufacturer to join the Steel Door Institute's select membership. This brings SDI's membership to 12 manufacturers.

The approval process included an onsite audit by steel door and frame engineers that certified HMX as meeting SDI's rigorous standards. They had to meet other business criteria as well, such as selling products primarily through distributors in at least 15 states.

Based in Phoenix, AZ, HMX has roots in manufacturing hollow metal doors and frames manufacturing that go back 25 years. "We created our Project Services division in 2011 to compliment and add to the quick-ship services our company was founded upon," said Steve Gay, Vice President and General Manager of HMX. "Joining an elite organization like SDI was the natural next step in our company's development. We believe our SDI membership proves what we've been saying all along: HMX manufactures doors and frames that are consistent and of high quality."

About the Steel Door Institute

The Steel Door Institute (SDI) was established in 1954 as a voluntary, unincorporated, non-profit business association whose mission is to promote the use of steel doors and frames in the construction industry. Representatives of SDI member companies create and publish manufacturing, quality and performance standards promulgated by the association, and distribute them to licensed architects and construction specifiers at no charge.

Membership is open to all American-based companies engaged in the production for sale of swing steel doors and/or frames on a national basis for at least two years. Members mutually agree to establish and abide by SDI manufacturing and quality standards that apply to all doors and frames they produce.
