

## New Glossary on Steel Door Institute Website

**December 4, 2014 WESTLAKE, Ohio** – The Technical Committee of the Steel Door Institute has released a complete update of the glossary of terms for hollow metal doors and frames.

The document, [SDI 134-14](#), is available without charge on the SDI website

The glossary provides a user-friendly interface for browsing or searching definitions. Technical drawings are included with many of the definitions to provide further clarification.

This document replaces the prior version, SDI A250.7, which was published in 2011.

#####

### **About the Steel Door Institute**

The Steel Door Institute (SDI) was established in 1954 as a voluntary, non-profit business association that develops quality and performance standards for steel doors and frames.

Representatives of SDI member companies create and publish these standards, which are made available without charge to architects and other design professionals to ensure quality and consistency of hollow metal doors and frames used in construction. [www.steeldoor.org](http://www.steeldoor.org).
