A COMPLETE SOLUTION FOR HARDWARE

Testing and certification services for door hardware, including locks, hinges, latches, closers, and exit devices

- **Forced Entry**
  Establish a measure of resistance for door hardware components subject to attacks in order to help resist unwanted entry.

- **Cycle / Durability Testing**
  Provide verification of marketing and warranty claims by subjecting to accelerated cycling to simulate field operating conditions.

- **Blast & Ballistics Resistance**
  Assess the blast and ballistics resistance & the science of mechanics that deal with launching, flight, behavior, and the effects of projectiles such as bullets.

- **Fire**
  Ensure your hardware products remain engaged as required by international building codes & regulatory requirements when exposed to fire.

- **Electrical**
  Ensure compliance of electronic access control (EAC) systems & other electric hardware components as they continue to replace traditional doors and basic door hardware.

- **Structural Testing**
  Determine hardware performance under various environmental and structural conditions.

- **Wind Storm**
  Evaluate the overall impact, static loads, and cyclic loads to identify performance characteristics in hurricane and tornado zones.

- **Data Acceptance**
  Obtain certification through participation in our SATELLITE™ program, which allows you the option to control your certification experience.

- **Performance & BHMA Testing**
  Obtain grades for hardware components specified by the applicable ANSI/BHMA standard to validate product performance.

- **Product Performance / Comparison Testing for Retailers**
  Obtain grades for hardware components to validate product performance and separate from other hardware products in the market.
Intertek is an industry leader in the testing, inspection, and certification of doors, door frames, and hardware. With one of the most recognized certification marks in the industry, **Intertek is the premium choice for all of your hardware needs.**

Intertek offers complete testing and certification services for door hardware, including locks, hinges, latches, closers, and exit devices. With the ability to perform testing to a variety of performance requirements and regional provisions, including those stipulated for Miami-Dade County, Florida and the Texas Department of Insurance, Intertek is the premium choice for all of your opening needs.

Intertek tests to industry standards including: ASTM, BHMA, CAN/ULC, CSFM, Dade County, FM, HUD, TDI, UBC, UL, WDMA
